Data Readout Connector (DRC)

The function of the **Data Readout Connector (DRC)** is to read logging data from the storage section and to download the "logging data table" to the storage section through it.

The connector connects to the computer with a USB 2.0 connector, which allows for fast and convenient data readout. The connector also has a USB to CAN conversion function, convenient debugging and detecting the status of various tools of our company.

Specifications

	DRC-1
General Spec	
Mechanical Interface	13-core
Temperature Range	-25°C -85°C
Diameter	50mm
Length	217mm
Communication Interface with the tool	CAN
Computer Interface	USB
CAN Transmission Rate	1MB/S
USB Write Rate	4MB/S
